

DIAMOND X™ – NOVOMATIC presents Gaming beyond X-pectations

NOVOMATIC launches a brand new upright cabinet for the international casino markets: The new DIAMOND X™ 2.32 is all set to introduce an exceptional, fresh style and crisp game presentation on the casino floor.

Gumpoldskirchen, March 8th, 2022 – Can a cabinet tick all the boxes? Captivating design, incorporating a black metro finish contrasted by a dynamic LED lighting concept that creates a visually enclosed framework for the crisp presentation of game content. All that meets ergonomic exterior design, comprising all the best angles plus ample foot space. The DIAMOND X™ 2.32 presents an exceptional accomplishment in cabinet design, presented by NOVOMATIC for brilliant performance and suitably complementing NOVOMATIC's market-leading portfolio of games.

The new cabinet's most intriguing visual elements are certainly the facelift of the grill on the front door panel as well as the indirect silhouette lighting concept, featuring LEDs for the intelligent game-synched colour effects. Main monitor features are two large 32" full HD game screens with PCAP touch on the bottom screen plus a sophisticated, integrated topper that blends in perfectly with the machine to cater for enhanced Progressives support and high visibility on the gaming floor.

The standard player interface signals a return to a purist approach with a straightforward button deck. The discerning operator can optionally choose to specify a flush 15.6" TouchDeck™ player interface that is complemented by two extra-large physical buttons for familiar reel spin haptics. Player convenience is further catered for by maximized ergonomics with an XL footwell, an optional USB charger and an integrated high-performance sound system. Floor staff will value the maintenance-friendly door concept that grants excellent access to the key components.

The DIAMOND X™ 2.32 is an exceptionally elegant dual-screen machine characterized by its black metro finish and exquisite LED silhouette – ready for all demands of the modern gaming floor with premium components, easy integration of player tracking systems and full compatibility with standard protocols.

Jakob Rothwangl, VP Global Sales NOVOMATIC AG, said: "The DIAMOND X™ 2.32 is definitely a statement. It perfectly exemplifies our very focused approach for 2022: future-focused, business-oriented and committed to our customers' demands. This cabinet is the product of intensive R&D efforts, meticulous discussions with customers, distributors and regional units as well as in depth research of market requirements – all with the one purpose to create a future generation gaming cabinet that sets the new standard for what is yet to come. We aimed high, but what our engineers came up with, was even beyond our expectations."

About NOVOMATIC

The NOVOMATIC AG Group is one of the biggest international producers and operators of gaming technologies and employs around 21,000 staff worldwide. Founded by entrepreneur Professor Johann F. Graf in 1980, the Group has locations in more than 45 countries and exports high-tech electronic gaming equipment and solutions to about 90 countries.
