

NOVOMATIC Drives the Evolution of the Colombian Market at GAT Cartagena 2026

The company combined the launch of linked progressive jackpots with an active role in the regulatory discussions shaping the future of slot machines in the country.

Cartagena, April 2, 2026 – Following a remarkable participation at GAT Cartagena 2026, NOVOMATIC Gaming Colombia reaffirmed its leadership in the Latin American gaming industry by combining a strong technological showcase with a prominent role in the discussions shaping the future of the sector. The company, which has led gaming device imports in Colombia for more than three years, used this strategic platform to present solutions designed to maximize performance in gaming venues across the region.

The exhibition at stand A27 focused on innovation in progressive jackpot systems and high-performance configurations. The centerpiece of the showcase was the XTENSION LINK™ series, which included the debut of **XTENSION LINK™ Evolution** and **XTENSION LINK™ Volume 4**, the latter presented in the **BLACK EDITION II 1.49J** cabinet featuring its signature J-curved screen. The offering was complemented by high-impact titles such as **SUPERIA GAMES™ WIN WAYS™** and **RISING TREASURES™**, as well as **XTENSION LINK™ Ultimate** and the **Impera PROLINK™** titles, consolidating a versatile and state-of-the-art portfolio for regional operators.

In addition to the linked systems, NOVOMATIC showcased a selection of multi-game libraries designed to provide operational flexibility for different types of gaming floors. Among them were **Magic Games Premium HD**, **GAMINATOR™ X5**, **Impera Line™ HD Edition 9**, and **Superia Games™ Premium 3**, installed on the modern **FUNMASTER 2.27/3.27** and **PANTHER 2.27** cabinets.

The brand's institutional presence was evident from the very beginning of the event with the participation of **Max Bauer, Vice President Latin America & Caribbean at NOVOMATIC**, in the official ribbon-cutting ceremony. This leadership continued throughout the conference agenda, where **Manuel Del Sol, CEO of NOVOMATIC Gaming Colombia**, and **José Casapía Bardales, Institutional Relations Manager of NOVOMATIC Peru**, delivered one of the most insightful contributions during the Land-Based Panel.

During the session, Del Sol and Casapía analyzed the critical role manufacturers play in the certification processes under Colombia's machine reliability regulations. Both experts provided a detailed overview of the market, identifying the volume of machines that will need to adapt to the new standards and outlining the role manufacturers will play in supporting this transition.

About NOVOMATIC

The NOVOMATIC AG Group is, as a producer and operator, one of the largest gaming technology groups in the world and employs more than 26,000 people. The Group was founded by the industrialist Professor Johann F. Graf in 1980 and has locations in about 50 countries, and exports innovative gaming equipment, system solutions, lottery system solutions, and services to more than 130 countries. The Group operates gaming terminals and video lottery terminals (VLTs) in its approximately 2,000 own electronic and regular casinos, as well as via rental models.

The NOVOMATIC AG Group is active as a full-service provider in all segments of the gaming industry through its numerous international subsidiaries, offering a comprehensive omni-channel product portfolio for partners and customers worldwide. This ranges from terrestrial gaming products and services, through management systems, cash management solutions, and online, mobile, and social gaming solutions, to lottery and sports betting solutions, as well as a whole host of other first-rate products and services.
