## IGT, Novomatic's Greentube Sign Cross-Licensing Deal

*International Game Technology and Greentube, Novomatic's digital arm, have signed a patent cross-licensing agreement related to remote game server technologies.*

---

International Game Technology PLC and Greentube, the Novomatic digital gaming and entertainment division, announced that they have signed a patent cross-licensing agreement that includes valuable patents related to remote game server (RGS) technologies for providing games over a network.

With the execution of this agreement, IGT can offer the global gaming industry a patent license to the combined RGS portfolios of IGT and Greentube. Financial terms of the agreement have not been

disclosed.

"This agreement continues the spirit of collaboration and innovation that IGT seeks to foster in our industry," said Renato Ascoli, IGT CEO, global gaming. "We look forward to providing the entire gaming industry with the opportunity to license the combined RGS portfolios of IGT and Greentube, which cover compelling technologies for delivering games to customers wherever they play."

"We are very pleased to reach this significant intellectual property agreement with IGT, as Greentube continues to expand its premium gaming products and solutions," said Thomas Graf, Greentube CEO. "The combined RGS portfolios of Greentube and IGT are truly state-of-the-art, representing a combined prowess and gaming industry leadership that is well-positioned to fuel continued success."

Both companies will continue efforts to protect their intellectual property, individually and through collaborations with gaming industry developers and suppliers, in an effort to advance innovation and excitement in the gaming market.

## Greentube takes 80 per cent stake in Ineor ahead of 'a very big year'

**Greentube** has taken a plunge into the M&A pool once more, with "another significant move" and "fantastic" addition reflected on following the purchase of software development firm **Ineor**.

The latest acquisition, which is said to have come ahead of a "very big year for us strategically", sees the Novomatic interactive division gain an 80 per cent shareholding in the Slovenia-based company.

A "strategic objective" of the addition of Ineor, a long-term tech partner of the group across online gaming and sports betting, is to deliver the integration of "critical" software development capabilities and resources.

Ljubljana-based Ineor is active in the field of computer programming, specialising in the development of gaming software. The company currently supplies software development services and digital solutions.

**Dejan Spasovski**, founder of Ineor, commented: "For over a decade, Ineor regularly delivered Greentube's and Novomatic's key strategic solutions, together building our amazing, role model partnership – and now achieving this important milestone for us all.

"By constantly technically challenging us, Greentube uplifted Ineor to become a world leading gaming software development company, always staying at least a step ahead and delivering on time, on budget and with zero bugs.

"We are excited to have become a part of the Greentube family through this acquisition, which will allow us to continue to power one of the online gaming world's biggest companies by providing amazing solutions for all operators and players globally."

This becomes the latest acquisitive manoeuvre by Greentube, following a 65 per cent stake being acquired in **Alteatec**, and purchase of US-based online casino development studio **Present Creative**.

The company also entered into a joint venture with emerging studio **Flamingocatz**, which is charged with aiding the creation of fresh content for North American markets.

"This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically," said **Michael Bauer**, CFO/CGO at Greentube.

"Ineor has been a highly valued partner for a number of years and it's great to be able to harness its resources in-house.

"Having recently launched Greentube Mynt as well as making other significant moves in the M&A space, we are well-positioned to accelerate our growth throughout 2023 across regulated markets worldwide."

## Greentube Buys 80% Of Ineor's Shares

Greentube, a leading supplier and developer of games and gaming solutions for flash internet games without downloads, iTV and mobile delivery based in Austria, has publicly announced that it has **completed the purchase** of 80% of the shares of one of the leading Slovenia-based software development companies, Ineor.

### Main purpose of the purchase:

The main reason for this purchase was Greentube's aim to acquire and integrate important software development capacities and assets to strengthen its own offering around the world.

But that's not all; since Ineor is already a technology partner of Greentube and with its help, the company has been able to advance software development, this acquisition will also bring Greentube the latest online gaming and **sports wagering** technology to its offering.

Commenting on the acquisition, Michael Bauer, CFO/CGO at Greentube, said: *"This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically. Ineor has been a highly valued partner for a number of years and it's great to be able to harness its resources in-house."*

*"Having recently launched Greentube Mynt as well as making other significant moves in the M&A space, we are well-positioned to accelerate our growth throughout 2023 across regulated markets worldwide."*

Dejan Spasovski, founder of Ineor, added: *"For over a decade, Ineor regularly delivered Greentube's and Novomatic's key strategic solutions, together building our amazing, role model partnership – and now achieving this important milestone for us all."*

*By constantly technically challenging us, Greentube uplifted Ineor to become a world leading gaming software development company, always staying at least a step ahead and delivering on time, on budget and with zero bugs."*

*We are excited to have become a part of the Greentube family through this acquisition, which will allow us to continue to power one of the online gaming world's biggest companies by providing amazing solutions for all operators and players globally."*

### Similar deals:

This latest purchase comes after three other similar deals that have ensured Greentube is unmatched in technology and creativity.

Examples of these deals are: the recent **purchase of Alteatec's 65% shares**, which powered Greentube's casino management system and platform technology, and a partnership with fast-growing studio Flamingocat to debut a joint company that will contribute to the development of fresh, cutting-edge content for North American regulated markets.

However, even before these deals, there was a purchase agreement with Present Creative, a renowned **US-based** development studio which was engaged in its own content development for the iGaming and iLottery sections.

### Greentube Mynt:

All these deals happened because Greentube proved to be a worthy partner who can offer the latest technology and help all these companies become globally known.

But what really sealed these deals was Greentube's constant technological development. An example of this is that not even the first month has passed since the beginning of this new year, and the provider has already introduced its innovative latest technological tool for creating and providing games, Greentube Mynt.

Powered by a non-traditional Remote Gaming Server (RGS), Greentube Mynt represents the future of the iGaming industry and the base for a next-level iGaming experience for players.

**About:**

**Greentube**, a leading supplier and creator of games and gaming solutions for no download flash internet games, iTV and mobile delivery, is based in **Austria**, with development offices around the world. The company is founded in 1998, but after going through several name-change phases, the company name is officially established in 2011, after their acquisition by Astra Games, a **NOVOMATIC** owned company.

Its huge, fast growing gaming portfolio includes titles such as **The Alchemist**, **Ramses II** and **Mermaid's Pearl**.

Headquartered in **Ljubljana**, Slovenia, Ineor is one of the leading computer programming companies, with a particular interest in game software development.

It currently provides advanced software development services and non-traditional critical digital solutions for various global organizations.

## **Greentube enhances software development capabilities with Ineor acquisition**

Greentube, the NOVOMATIC Digital Gaming and Entertainment division, has made another significant move in the M&A space with the acquisition of international software development specialist Ineor.

The latest completed deal, which has seen Greentube buying 80% of the shares in Slovenia-based Ineor d.o.o., has the strategic objective of acquiring and integrating critical software development capabilities and resources for the benefit of the entire Greentube group worldwide.

The acquisition also secures specialised know-how from within Ineor, a long-term technology partner of Greentube's, in the areas of online gaming and sports betting.

With its base in Ljubljana, Ineor is active in the field of computer programming, specialising in the development of gaming software. The company currently supplies advanced software development services and breakthrough key innovative digital solutions for a wide range of multinational organisations.

The latest acquisition follows on from three other deals that have strengthened Greentube's technological and creative capabilities. Greentube recently acquired a 65% stake in Alteatec, boosting its Casino Management System and platform technology, while also entering a joint venture with emerging studio Flamingocatz, to aid the creation of new, exciting content for North American markets.

Those agreements followed on from the acquisition of Present Creative, a US-based development studio with a proven track record of creating content for the iGaming and iLottery sectors.

Greentube has also marked a new chapter in the future of igaming this year by launching Greentube Mynt, its revolutionary new technology stack for producing and supplying games. With a state-of-the-art Remote Gaming Server (RGS) at its heart, [Greentube Mynt](#) is the foundation for a future-proofed, complete games entertainment solution that provides operators with a next-level player engagement and retention tool.

**Michael Bauer, CFO/CGO at Greentube**, said: "This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically. Ineor has been a highly valued partner for a number of years and it's great to be able to harness its resources in-house.

"Having recently launched Greentube Mynt as well as making other significant moves in the M&A space, we are well-positioned to accelerate our growth throughout 2023 across regulated markets worldwide."

**Dejan Spasovski, founder of Ineor**, said: "For over a decade, Ineor regularly delivered Greentube's and NOVOMATIC's key strategic solutions, together building our amazing, role model partnership – and now achieving this important milestone for us all.

"By constantly technically challenging us, Greentube uplifted Ineor to become a world leading gaming software development company, always staying at least a step ahead and delivering on time, on budget and with zero bugs.

"We are excited to have become a part of the Greentube family through this acquisition, which will allow us to continue to power one of the online gaming world's biggest companies by providing amazing solutions for all operators and players globally."

## Greentube acquires 80% of Ineor's shares

Novomatic's Greentube brand has acquired software development company Ineor, which has seen the former buy 80% of the latter's shares.

By Matthew Nicholson

Listen To Article

Ineor is a Slovenia-based business that previously had a long-term deal with Greentube and specialises in online gambling and sports betting.

Michael Bauer, CFO/CGO at Greentube, said: "This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically. Ineor has been a highly valued partner for a number of years, and it's great to harness its resources in-house.

"Having recently launched Greentube Mynt, as well as making other significant moves in the M&A space, we are well-positioned to accelerate our growth throughout 2023 across regulated markets worldwide."

Meanwhile, Ineor Founder Dejan Spasovski added: "For over a decade, Ineor regularly delivered Greentube and Novomatic's key strategic solutions – together building our amazing, role model partnership – and now achieving this important milestone for us all."

The news comes shortly after Greentube acquired a controlling share in iGaming management system Alteatec.

The deal specifically sees Greentube Austria acquire a majority stake in the Malta-based IT company, providing it access to Alteatec's Olympus One platform technology.

Furthermore, Greentube will be able to use Alteatec's live dealer streaming and voiceover technology as part of the deal.

Greentube has bought stakes in several companies in recent months, also acquiring a 40% stake in Flamingocat – a game developer established in 2022, to bring disruptive slot titles to the Americas through innovative mathematics.

## Greentube Acquires Software Specialist Ineor

NOVOMATIC continues to report strong performance for its digital gaming and entertainment industry, Greentube, which has completed another acquisition deal

Image Source: Shutterstock.com

**Greentube** has acquired **Ineor**, an established international software developer which will help the company to further strengthen its presence in the iGaming market and develop hard-hitting solutions that help advance the entire industry.

### Greentube Grows Portfolio with Ineor

The company acquired 80% of the shares in the Slovenia-based company, and will now leverage its critical software development capabilities and resources to boost its own offer globally.

Ineor has an established track record in both computer programming and the development of dedicated gaming software. The company already provides its solutions in the digital sector for a number of multinational organizations.

Greentube stands to benefit from this deal by incorporating this expertise into its own offer, following on a number of similar integrations of late. The company acquired a 65% stake in [Alteatec](#) recently, and it now participates in [Flamingocat](#), an up-and-coming studio and developer of iGaming content with an exclusive focus on the North American market.

Previously, Greentube also acquired **Present Creative**, another prominent US-based studio dedicated to building strong and distinguishable iLottery and iGaming products. Greentube has been able to leverage its strong momentum from previous years to quickly boost its production capacity and ensure that it snaps up assets that contribute to the company's further expansion moves in global markets.

Greentube also announced the [Greentube Mynt](#) solution designed to significantly boost the company's capabilities in producing and delivering new products, all of which are brought forward with the help of a Remote Gaming Server. Commenting on the latest partnership, Greentube CFO/CGO **Michael Bauer** said:

*This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically. Ineor has been a highly valued partner for a number of years and it's great to be able to harness its resources in-house.*

## Challenging Ineor to Be Better

Ineor founder **Dejan Spasovski** was equally thrilled to see his company become a member of the Greentube and NOVOMATIC's family. The companies have already worked together, and Spasovski said that Ineor has been able to grow as a global software expert thanks to the constant challenges that its new owner laid out for it over the years.

"We are excited to have become a part of the Greentube family through this acquisition," Spasovski added and said that the partnership will be a mutually-beneficial one.

## GREENTUBE ACQUIRES 80% STAKE IN LONG-TERM PARTNER INEOR

26th January 2023 10:22 am GMT

**Novomatic's iGaming division Greentube has continued its recent M&A spree with the acquisition of Slovenian iGaming software developer Ineor.**

Greentube has acquired an 80 per cent majority stake in the Ljubljana-based supplier, a long-term technology partner of Greentube for online gaming and sports betting.

"This acquisition is a fantastic one as we continue to bolster our technology platform in what will be a very big year for us strategically," said Greentube chief financial officer and chief games officer Michael Bauer. "Ineor has been a highly valued partner for a number of years and it's great to be able to harness its resources in-house.

"Having recently [launched Greentube Mynt](#) as well as making other significant moves in the M&A space, we are well-positioned to accelerate our growth throughout 2023 across regulated markets worldwide."

Ineor founder Dejan Spasovski said: "For over a decade, Ineor regularly delivered Greentube's and Novomatic's key strategic solutions, together building our amazing, role model partnership – and now achieving this important milestone for us all.

"We are excited to have become a part of the Greentube family through this acquisition, which will allow us to continue to power one of the online gaming world's biggest companies by providing amazing solutions for all operators and players globally."

The latest acquisition follows on from three other deals that have strengthened Greentube's technological and creative capabilities, including a [65 per cent stake in Alteatec](#), a joint venture with [studio Flamingocat](#), and the [acquisition of Present Creative](#).

## Greentube stellt neuen IT-Direktor ein

Mit reichlich Erfahrung von Logistikriesen wie TNT und DHL wird Christian Vöhr die Verantwortung der IT-Infrastruktur bei Greentube aus der Novomatic Gruppe übernehmen! (Bildquelle: Greentube)

Der in Österreich ansässige Entwickler Greentube hat einen neuen Leiter der IT-Abteilung eingestellt, der verschiedene Aufgabenbereiche begleiten wird. Christian Vöhr wird das wachsende Team des Unternehmens verstärken und dabei helfen, die erfolgreiche Strategie der Novomatic Internet-Tochter aufrechtzuerhalten, während das iGaming-Studio versucht, die Produktivität, Effizienz und Wachstum zu steigern. Dabei stehen die vielschichtigen Unternehmensziele stets im Vordergrund, wobei der neue Mann in leitender Funktion neben der IT-Infrastruktur auch in Aufgaben des Managements sowie strategische Planung und deren praxisbezogene Umsetzung eingebunden sein wird. Auch wenn die berufliche Laufbahn des neuen IT-Direktors bei Greentube auf den ersten Blick nicht wirklich viel mit Online Casinos gemeinsam hat, mit seiner Erfahrung aus großen Konzernen wird Christian Vöhr dem Spielentwicklungsstudio sicher weiterhelfen können.

### Christian Vöhr wird neuer IT-Direktor bei der Greentube GmbH

Christian Vöhr hat fast seine gesamte Karriere im Bereich der Logistik verbracht. Unmittelbar nach seinem Abschluss an der Donau-Universität Krems startete er jedoch zunächst im Jahr 2006 bei Paramedic im pharmazeutischen Bereich mit seinem Zivil- und Freiwilligendienst. Sicher konnte er auf dieser Ebene auch wertvolle Erfahrungen fürs Leben sammeln. Erst danach hat es ihn zum Logistikriesen TNT verschlagen, wo er sofort aufbauend auf seinen Studienbereichen als IT-Manager Verantwortung übernehmen konnte.

Anschließend war die Arbeit für ein so renommiertes Unternehmen wie DHL und die SVD Büromanagement GmbH für Vöhr eine hervorragende Gelegenheit, seine Fähigkeiten zu verfeinern und zusätzliche Erkenntnisse zu gewinnen. Während seiner fast zwölfjährigen Tätigkeit bei TNT stieg er schließlich zum Leiter auf und konnte seine Fähigkeiten in Österreich sowie der Schweiz unter Beweis stellen. Es hat im Grunde den Aufstieg des Online-Geschäfts mit allen Facetten mitgemacht und dabei maßgeblich mit daran gearbeitet, die Dienstleistungen in dieser sich seit Jahren im Wandel befindlichen Branche voranzubringen und mit den Management- und Aufsichtsaufgaben seiner Position zu verbinden.

Mit seiner akademischen Laufbahn hat er professionelle Kenntnisse im Controlling, Marketing sowie für die [Online Casinos](#) zunehmend wichtigeren Bereich ISO 27000 und ISMS erhalten, von denen Greentube sicherlich profitieren wird.

### Ein interessanter Schachzug

Die meisten Online Casinos sowie deren Softwarepartner holen sich Fachkräfte mit Glücksspielerfahrung ins Haus. Mit der Personalentscheidung Christian Vöhr geht der Anbieter bester [Novoline Casinos](#) seinen eigenen Weg. Dabei scheint bei genauerer Bewertung schnell klar zu werden, dass Greentube sich einen echten Allrounder an Bord geholt hat, der schon viele Programme in ähnlich herausfordernden Branchen IT-seitig umsetzen konnte. Die Paketbranche hat praktisch im selben Zeitraum wie die Online Casinos gesellschaftsfähig geworden sind, eine rasante Entwicklung durchlaufen, aufgrund des florieren e-Commerce.

Entsprechend hat Christian Vöhr im Rahmen seiner beruflichen Laufbahn bei TNT Express / TNT Swiss Post diverse konzernweite Projekte mit angestoßen, die in den jeweiligen IT-Bereichen parallel zum Tagesgeschäft umgesetzt werden mussten. Neben der Zusammenführung der IT-Abteilungen der neu gebildeten Region „Schweiz und Österreich“, inklusive eines Service Desks in vier Sprachen, war meine Aufgabenschwerpunkte das Outsourcing aller IT- und Backoffice-Prozesse an externe Dienstleister. So beschreibt es Christian Vöhr auf seiner LinkedIn Profil.

### Für das Wachstumsprogramm der digitalen Novomatic Tochter der richtige Mann

Marken wie Greentube und Novoline sind Spielern über die Grenzen der DACH-Märkte bekannt. Und Novomatic will mit aller Macht im Online-Glücksspiel expandieren. Es wurden in den letzten Jahren zahlreiche Übernahmen forciert sowie Beteiligung an Softwarehäusern, um weiter in diesen zukunftsweisenden Bereich vorzudringen, der seit Jahren als einziger Geschäftsbereich praktisch durchgängig zweistellige Wachstumsraten liefert. In drei Monaten hat der Glücksspielanbieter allein bis Anfang 2023 drei dieser drei Unternehmen: Alteatec, Flamingocat und Present Creative gekauft oder die Mehrheitsbeteiligung erworben.

Hierfür braucht der Online-Gaming-Anbieter und Entwickler von [Online Casino Echtgeld](#) Spielen eine außergewöhnliche Infrastruktur, um alle Bereiche seriös abdecken zu können. Da scheint die branchenfremde Erfahrung von Christian Vöhr gerade zu perfekt zu passen. Denn: Schon in seiner zweiten Station nach vielen Jahre TNT hat er ein Megaunternehmen bei der Implementierung seiner Angebote vom Start weg in einer Führungsrolle mit begleitet. Im Jahr 2015 ist DHL als weltgrößter Logistikkonzern mit dem Paketgeschäft in Österreich und 2018 auch in der Schweiz gestartet.

Nach dem Konzept „Greenfield“ entstanden zwei Gesellschaften mit 2500 Mitarbeitern, 40 operativen Standorten, 2500 Niederlassungen von Partnern und mehreren Drehkreuzen aus dem Nichts. Vom Tag des Markteintritts an war der neue Greentube IT-Direktor Christian Vöhr verantwortlich für den Aufbau einer funktionierenden IT-Organisation (Infrastruktur, Servicemanagement, Informationssicherheit und Datenschutz, funktionsübergreifendes Prozessmanagement, Kundenintegration und mehr), um den Anforderungen des jeweiligen Marktes gerecht zu werden.

Die Meldungen über Greentube nehmen seit Monaten zu. Nicht nur der Start in Deutschland mit dem StarGames Casino oder das Joint Venture Deutsche Glücksspiel Gesellschaft mit der Gauselmann Gruppe sind hierbei zu erwähnen. Europaweit und auch in Nordamerika startet der Provider von Kultspielen wie [Book of Ra](#) und Sizzling Hot mittlerweile durch.

In der Unternehmensmeldung von Greentube heißt es: „Wir möchten unseren neuen IT-Direktor, Christian Vöhr, offiziell in der Greentube-Familie begrüßen und vorstellen! Er bringt eine Fülle an Erfahrung, Tatkraft und Fachwissen mit, und wir freuen uns darauf, die Abteilung unter seiner Führung weiter wachsen zu sehen. Wir wünschen dir viel Glück, Christian, und willkommen bei Greentube!“

## Greentube's new release Manic Potions™ offers magical playing time

👤 Radosav Milutinovic 🕒 January 24, 2023

📁 Latest Casino and Gambling News, Casino News, Newest casino games, Gaming Industry News, Mobile gaming, The Players Lounge, Online Gambling News

The NOVOMATIC Digital Gaming and Entertainment division, Greentube, has released the slot game Manic Potions™. **According to the company**, the latest release is the most magical one to date and Greentube sees it as the best way to start the year.

### Variety of features:

**Manic Potions™** is set up as a five-reel slot offering **1024 winning opportunities**. The slot has a wide variety of features including a respin bonus, the **Lock & Spin bonus** and the **Wincreasing™ mechanics** boasted as a medley of symbol modifiers aimed at rendering increased win potential.

When a potion symbol is combined with other symbols, it forms a winning combination that triggers additional bonus spins, whereas a single free respin and modifier are automatically activated. This sequence may be repeated as long as there are potion bottle wins available in the game. Likewise, if players land a blue potion, each win will be awarded **a mystery multiplier**, and yellow potions will expand the wilds into a stack across the reels.

### Might mechanics:

Furthermore, landing green potions will give rise to the occurrence of an **additional row of symbols** during a respin round. Finally, the last manic potion symbol – the red one – will invite an additional reel on stage to provide random wins from the right to the left side of the reels. The mighty **Lock & Spin Wincreasing™ mechanics** will be propelled anytime during the gameplay when at least four scatter symbols are landed on the reels, and the players will be inducted into the frenetic **Lock & Spin Wincreasing™ Bonus**.

This round turns each position on the grid into a separate reel to award three additional spins which are reset every time a multiplier is landed. If at least three equal multiplier values are landed across the reels and next to each other, the multipliers will form a random combination **at a single position** to allow additional space for further combinations. At the end of the gameplay, the **total bet is multiplied by the total multiplier**, while the win may be doubled if the full grid is achieved.

### Magical playing time:

**Manic Potions™** is the 2023 kick-off game slot of **Greentube**, one of the pioneering and leading full-service providers in the online and mobile gaming sector. The gaming vertical of **NOVOMATIC**, the leading European gaming technology company, is optimistic about its first 2023 release.

**Steve Cross, Director of Games Development and Operations at Greentube**, said: "We're incredibly excited about the release of Manic Potions™ and believe this title will be amongst the early favorites as 2023 begins to unfold. With a whole host of incredibly lucrative bonus features and multipliers crammed into this title, we're confident players will have a magical time playing it!"

intergameonline.com, 24.1.2023

Greentube's latest slot, Manic Potions, features five reels and 1,024 ways to win.

The Novomatic Digital Gaming and Entertainment division's release features a respin bonus and a Lock & Spin bonus with a Wincreasing mechanic.

Whenever players land a winning combination featuring a potion bottle symbol, the respin bonus occurs, which sees a single free respin and

modifier automatically triggered.

This process can repeat indefinitely until no more potion bottle wins take place.

Steve Cross, director of games development and operations at Greentube, said he expects Manic Potions to "be among the early favourites as 2023 begins to unfold."

Should a blue potion land, a mystery multiplier is awarded to any win after a respin, while yellow potions see any wilds expand into a stack.

Green potions see an additional row of symbols appear during a respin, while the game's red potion symbols sees an additional reel appear with wins also paying from right to left.

yogonet.com, 24.1.2023

## Greentube launches new magic-themed slot title Manic Potions

**Greentube**, NOVOMATIC's interactive gaming division, announced Tuesday the launch of its latest slot game, called **Manic Potions**. The 5-reel, 1024 ways to win slot offers a "concoction of fantastic features" including a respin bonus, Lock & Spin bonus with a Wincreasing mechanic, and "a medley of mystic modifiers."

**Whenever players land a winning combination featuring a potion bottle symbol, the respin bonus occurs**, seeing a single free respin and modifier automatically triggered. This process can repeat indefinitely until no more potion bottle wins take place.

Should a **blue potion** land, a mystery multiplier is awarded to any win after a respin, while **yellow potions** see any wilds expand into a stack. **Green potions** see an additional row of symbols appear during a respin while the game's **red potion** symbols see an additional reel appear with wins also paying from right to left.

**If four or more scatter symbols land on the reels at any time during base gameplay, the Lock & Spin Wincreasing Bonus will be triggered.** This sees each position on the grid become its own individual reel, with players receiving three respins that reset every time a multiplier lands into view.

**If three or more of the same multiplier values land adjacent and horizontally, the multipliers combine into one position at random**, freeing up space for more multipliers. At the end of the feature, the total bet is multiplied by the total multiplier. If a full grid is achieved, the total win is doubled.

**Steve Cross, Director of Games Development and Operations at Greentube,** said:  
"We're incredibly excited about the release of **Manic Potions** and believe this title will bite amongst the early favorites as 2023 begins to unfold. With a whole host of incredibly lucrative bonus features and multipliers crammed into this title, we're confident players will have a magical time playing it!"
